TECHNOLOGY CONSULTING PROVIDES A TOTAL END-TO-END SOLUTION

Our Vision

Stroika Computer Software supports the future vision of an electronic government and is dedicated to helping our clients face the increasing challenges of a global Marketplace from a national prospect, by providing solutions today to achieve a successful tomorrow.

Our Technology

If you know anything about Stroika, you probably know that we aren't too focused on the technology we use - we're more focused on solutions. However, like any problem solver, we know our tools and we're proud of our proficiency.

Our Mission

To establish an industry in the field of information technology and raising the awareness and usage of e-commerce

- To contribute to the creation and development of information systems designed to support e-government projects within the country and the region.
- To provide expert IT consulting and technical training to improve the performance and productivity of organizations in both the public and private sectors.
- To contribute to the process of developing national cadres in the field of information technology, business and management.
- To develop various electronic systems using the latest up-to-date techniques used worldwide.

CUSTOM SOLUTIONS

We develop customized IT solutions to achieve organizational targets. Our solutions address all the major stages of the IT lifecycle and cover development, quality assurance, service management and support which will help in the governance and management of IT business process as a whole.
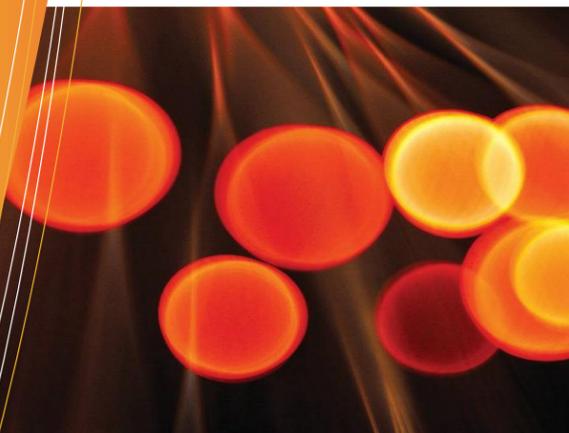

WEB SOLUTIONS

We offer elegant, spectacular, and impressive Web and Graphic designs. Our designers use the best practice schemes to produce inspiring Graphics and cross browser web designs.

EBUSINESS SOLUTIONS

We offer various automation engines to automate your business process to eliminate the time-consuming manual processes. The most famous automation engines that we usually advise of are SharePoint, and Sitefinity.

MOBILE APPLICATION DEVELOPMENT

Stroika has a good experience in B2C application through smartphone devices. Using all the latest mobile technology and connectivity, we extend your business's reach beyond a desktop computer at a fixed location.

We have the technical expertise and skill to develop applications for iOS and Android based smartphones.

Analysis and Business Efficiency

We can help your organization to analyze and then produce a solution design document that outlines the main problem and the best possible solution. The process starts by gathering the business requirements, analyzing them, and then giving the right solution, which should improve the operational efficiency.

BI Reporting Services

We implement the business intelligence (BI) reporting to generate rich and helpful dashboards, which simplify the data analysis and the management desiccation making.
